**Conestoga Simbras would like to introduce GC1933B Conestoga Patrol.**

Pictured below are from left to right his sire Conestoga Phoenix, His Grandsire Excelsus Phoenix and his Great Grand Sire PRR Pilgrim

GC1933B Conestoga Patrol has been used as a two year old in our stud and was charged with opening up our heifer group. Patrol achieved 19/20 in calf and we cannot wait to see these calves.

To see more of our stud with videos, pictures, newsletters etc please visit:

## GC1933B Conestoga Patrol.

### The Boy has become a Man!

Every now and then we get a calf that just stands head and shoulders above the rest. Every now and then you get a cow that breeds true no matter what.

Just look at this breeding. Patrols dam is Conestoga Avon Lee. The three pictures on her left are Avon Lee with her last three calves. The first is Patrol himself, the second is our next stud bull Conestoga Massey Ferguson and at last a heifer, Conestoga Avon Lee 2nd. Avon Lee is safely in calf to Tauro Timbuktu for this next calving season.

Above is Excelsus Wyoming HDL12115B who is Avon Lees sire and below is the famous Excelsus Pioneer who is the sire of Wyoming.

GC1947 Conestoga Paco. Yet another Awesome Excelsus Prairie 2nd son

Above left is Excelsus Prairie 2nd and right PRR Prevail.  
This awesome bloodline has produced the two recent SA record price bulls Richter Prairie and his son Richter Power.

GC1947 Conestoga Paco has been used in our stud herds and achieved a really good conception. Paco is bred from Excelsus Bibi who is bred from some of the original Excelsus bloodlines. Pictured left is her 2021 heifer calf Conestoga Bristol who is one of our strongest heifers at last years weaning. Bibi is safely in calf to Excelsus Pioneers 2nd. We cannot wait for that calf.
